LONDON Oct. 15.

THE Sweaith Monarch has more credit for cool bravery than he really merits. Among the diplomatic and higher political circles, it is well known that the Swedith Revolution did not originate in the mind of Galkavavs, but in the late Vergenness, who was then the French Mnifter a Stockholm. The mighty Monarch trembled when he down his fword, and would have retrafted, had it not been for the fpirited admonitions of the Ambaffador. It is not, therefore, improbable but another revolution may foon happen in that kingdom.

The King of Sweden, it is faid, has requefted the mediation of our court, in conjunction with Puffia, and the States-General, to make peace for him with Ruffia; previous to which, it feems, Mr Pitt infifts upon fertling frome preliminaries at Stockholm, refpecting the influence which France is hereafter to poffers in the Swediff Councils; and to this our miniffry are fuposed to be now attending. The King of Pruffia, by his Minifler at Copenhaeen, has made ftrong remonflrances, that Denmark fiall not go into further co operations with Ruffia; than are flipulated by the treaty: but in figure of this infimation, Denmark is making fuch preparations, as indicate a defire of going further, fo that, no leading opinion can yet be formed, upon what foundation flands the probability of peace.

a defire of going farther, so that no leading opinion can yer beformed, upon what foundation thands the probability of peace.

The Turks have been able to penetrate too far into the Imperial territories; the Austrians ought to have known this; perhaps, indeed, the Tarks themselves have not asked wicely in going too far from home, unless they can keep up such an army as will be able to cope with any combined force the enemy may bring mote the field. Every thing depends on the party that shall be superior in a regular engagement. At present the conduct of the Grand Vizir, in avoiding that where a very important point is not in view, cannot be too much commended. Tring out his enemies will weaken their force, in every respect, much more effectually than knocking a few thoulands on the head,

On the 6th of September, at 5. P. M. a Rufflan frigate and a Swedish met, a sew leagues south of Sweabourg, and engaced violently for three bours; when night coming on, the vessel which brought this in elligence could not discern which claimed the vistory.

So bare faced have been the Trauds of bankrupts, as to occasion that gear Judge Lord Thurlow, to say in Lincolns Inn-Hall, on a bankrupt netting the superior of the party of the demolished altogether."

Oct. 16. A certain great personage is faid to be much hurt at the raffine of his nephew, the Prince of Denmarl The unprovoked attack on Sweden is a violation of the late Danish declaration to that court, who solemnly afration to that court, who folemnly affirmed that they would only fulfill their treaty with Ruffa, according to to the strict letter, like a German principality's quota to the Emperor; but on no account would the Danes take an active and really hotile part against Sweden. Ruffian gold, and a strong letter of incense from the Empress to the young Prince, has effected this rash unjustifiable measure.

By a gentleman who arrived on Friday from Copenhagen, we are informed that the court of Denmark has been hitherto stopped in joining vigorously with Ruffia against Sweden, by the fole mediation of h s Britanic Majeffy, who is much respected by his nephew the Prince Royal. The Empress, however, has been pretty libe-

nephew the Prince Royal. The Emprels, however, has been pretty liberal in her prefents to the leading men in that kin, dom, befides promifing an addition of territory to the Dane, fhould he flep boldly forward.

"What is fingular," adds this gentlemm, "is, that the King though accounted pufilanimous, is eager for the war, while the Prince, although brave, active and wife, is only for keeping to the treaty between that nation and Ruffla, although he is at the fame time zealous in recruiting the army, and enlarging the navy."
